job number

(refer to engineer's specification)

preliminaries unless otherwise noted, all materials, fixtures and fittings in the schedule are to be supplied by the builder.

co-ordinate with building owners and tenants for construction within the tenancy and provide method of works and safety plans.

comply with landlord fitout guidelines and relevant statutory regulations.

site to be fully cleaned at practical completion by professional cleaners and made suitable for occupation. any work carried out after practical completion shall be cleaned in the same manner.

site to have a second full cleaning before trade by professional cleaners and made suitable for trade, coordinate with tenants prior to trade.

all works to be in accordance with manufacturer's instructions, local authority requirements or relevant australian standards.

sub-standard materials or workmanship will be rejected and replaced at builder's expense. materials are to be protected on site and handed over in 'as new' condition. items supplied by owner are to be inspected and certified by the builder as fit to use prior to use. protect all finished materials on site and during installation.

builder is to supply certification for all building works. notices, approvals and fees regarding construction are to be allowed for by the builder. the builder is to notify the certifier for all relevant local authority inspections.

builder is to maintain a safe site to statutory standards.

builder is to provide a program with critical path, progress and completion dates for the supply of outstanding information, authority inspection, approvals and the completion and review of shop drawings. this program is to be provided prior to commencement on site and to be updated weekly.

builder is to co-ordinate all trades, including nominated subcontractors and suppliers. where applicable, subcontractors are to provide shop drawings to the architect for review prior to fabrication. this is to be scheduled in accordance with the builder's program.

prior to commencement on site, subcontractors are to review all documents for clashes, ambiguities or omissions and provide written acceptable of conditions.

builder to provide written acceptance of site conditions following official site hand over and prior to establishment on site.

builder to provide evidence of all insurances. allow for engineer to design and inspect shopfront and signage frames, and to supply certificate.

builder to notify engineer and certifier for inspections.

defit works as noted on plans

within 24 hours of handover of site builder to complete, a site measure and issue to architect for review.

- Allow for all builders insurances
- Allow for compliance with landlord guidelines
- Building approval and structural design by LWA.
- Allow to request inspections and coordinate certification for approval
- CAT1 adjustments to all services by landlord unless noted otherwise
- Allow for detailed measure including levels and ceiling feature to be issued to architect within 24 hours of site establishment
- Coordinate with Thrills Co nominated suppliers for audio and security.

notes by Thrills Co means supplied by owner and installed by builder.

100mm is the nominal wall thickness and room sizes should be adjusted to suit existing dimensions and frame sizes.

provide manufacturer's standard and conditional warranties where applicable and include the operation and maintenance manuals.

undertake all necessary testing and commissioning prior to client operation. any equipment, apparatus, fixturing or cabling found to be defective shall be replaced.

for designated tests, including pre-delivery tests, record results and submit reports or certificates and include in operation and maintenance manuals.

base building works refer to landlord retail fitout guide.

metal worker scope of works to be gondola frames, gondola rail, overhead hang unit, gondola fixtures, main display table, pegboard shelving, changeroom mirror, worship cage, jeans wall rail, edges and flats, skirting, signage fittings, go back rail, fitting and shopfront, back of house fixtures.

shopfront to be concealed aluminium as detailed. I-beam transom as detailed including posts and bracing to building structure as required. All steel to be raw/black finished with gilly's liquid beeswax; single cloth rub thin smear; allow to dry and hand buff with lambswool pads.

All steel on shopfront to be raw/black and wax finished with gilly's liquid beeswax; single cloth rub thin smear; allow to dry and hand buff with lambswool pads.

subcontractor to review handover conditions and provide written acceptance to builder prior to establishment on site.

provide shop drawings to architect for review prior to fabrication, in writing. submit samples to architect for approval prior to fabrication. confirm all sizes prior to fabrication.

all joints to be fully welded and ground smooth uno. remove steel primer with paint stripper, not sandblasting. supply steel to site in clean (rust-free) condition.

confirm condition with site foreman at handover.

sinks to have built-in strainer (co-ordinate with plumber).

where not noted all steel finish to be raw/black finish and clear coated.

jeans wall, main display table, and power tee display gondola to be pre-wired for led lighting.

screen bracket supplied by Thrills Co and installed by builder.

plumber & drainer scope of works to be plumbing and drainage as required to connect sink to existing services affl.

subcontractor to review handover conditions and provide written acceptance to builder prior to establishment on site.

allow for construction approvals of drainage and plumbing systems and all fees associated.

align program authority inspections and approvals with builder's critical path.

connect kitchenette to existing drainage point and cold water

all exposed plumbing and drainage to be chrome plated. all tapware to be chrome plated brass. sink to be: 'lava bowl sink (rb). sink mixers to be: 'euro sink mixer.

sinks to have built-in strainer (co-ordinate with metalworker).

glazier scope of works to be mirrors, glass to display boxes and all glazing to shopfront.

co-ordinate with metalworker and cabinet maker. subcontractor to provide all certificates. pack, fill and seal joints to provide neat finish.

- 15mm frameless shopfront glass with channel concealed in floor, transom and head
- polish edge mirrors as detailed

painter scope of works to be primer and 3 coats of paint finish to internal plasterboard lining, wax finish to all timber and steel surfaces.

paint finish to all plasterboard surfaces to manufacturer's written specifications. clean and painted exposed ceiling and surfaces. tbc with architect.

- pf01 to all wall surfaces and open ceiling surface and services.
- Matt finish throughout except for stockroom door to be gloss enamel

signage scope of works to be

x1 bulkhead illuminated lightbox. graphic supplied by Thrills Co. coordinate install with Thrills Co. conceal all cables in through bulkhead. refer to detail

x4 vinyl decal. graphic supplied by Thrills Co. coordinate install with Thrills Co.

cabinet maker scope of works to be front counter, nestle tables, main display tables, gondolas, gondola shelves, pegboards, pegboard shelves, accessory display, jeans wall, talkers, retail mirrors, changeroom mirrors, shopfront plinths, office desk, sinks, store room shelves, overhead structure.

finishes to be bb hoop pine plywood, formply and softwood pine swd and swd2 to be finished with gilly's liquid beeswax; cloth rub thick smear; allow to dry and hand buff with lambswool pads and repeat.

appropriate swd to be used for carcasses for all joinery in retail area uno.

allow to penetrate counters, desks and cabinets for cables and finish off with cable caps. co-ordinate with relevant contractors.

main display tables, changeroom mirrors, accessory display box, jeans wall to be back lit with concealed led strip lighting prior to delivery to site.

NOTE:
all timber to be select grade and hand selected by LWA representative with builder if possible. builder to allow for associated costs.

all cabinetry to be pre-wired and have led strip lighting installed in workshop prior to site delivery.

floors scope of works to be mc render to entry.

floors to be flush with wall level and alternate floors, ensure no trip hazards.

finishes, wall & ceiling linings scope of works to be :

- flush and squareset plasterboards linings to wall, bulkheads, ceilings and associated stud work, battening, framing and hanging.
- flush and squareset swd lining to bulkhead as noted and associated stud work, battening, framing and hanging
- mc render all column and bulkhead as per drawn. extend inter-tenancy wall to underside of roof.
- Make good as required.

carpenter scope of works to be swd2 overhead hanging structure, exposed changeroom stud walls, internal stud walls, bulkhead frames, jeans wall frame, retail mirror cladding, changeroom mirror cladding, pegboard cladding, shopfront mullion,

contractor to provide written acceptance to builder prior to establishment on site

confirm all dimensions prior to construction. co-ordinate with cabinet maker.

electricians scope of works to check existing and fit of new electrical, lighting, signage, television, telephone, stereo, audio, data and door security in accordance with documents.

subcontractor to review handover conditions and provide written acceptance to builder prior to establishment on site.

supply and install emergency lights (recessed small head) and exit signs from clevertronics starlite emergency premium range.

data line to stockroom and counter, as per diagram. light switches to located in stockroom uni at 1050mm affl. gpos to be 300mm affl uno.

switches to be black plastic on timber or pf01 walls.

allow power from ceiling for shopfront signage. allow power to tv and cat5 cabling to counters, store front, and stereo system in stockroom, as per diagram and data.

power to be through coverplate flush with flooring as indicated on plan. wiring for stereo, subwoofer and speakers, as per diagram, coordinate with Thrills Co on locations.

allow to hang subwoofer and speakers from high tensile ss wire. storeroom door security pad to be 1050mm affl.

electrician to review all locations prior to installation. electrician to allow to fit with batten holders where necessary and install light fittings.

ensure all bulbs are edison screw type. white plastic ceiling roses for lamps and el05

note led strip lighting to main display table, gondola power tee, jeans wall, and changeroom mirror. coordinate with other trades.

Ensure cat6 data cables in bulkhead are easily accessible to contractors

electrical data and lighting:

- GPOs to desk, counter, back counter, retail floor, stockroom and change area
- Data to desk, people counter, WAP and counter
- Stereo wire from ceiling to desk.
- Camera wire from ceiling over front entry and counter to desk.

NOTE:

all cabinetry to be pre-wired and have led strip lighting installed in the workshop prior to site delivery.
