This technical cross-section diagram illustrates the internal structure of a circular object. The outer boundary is a solid black circle. Inside, there are several concentric dashed circles. Four specific points on these dashed circles are labeled with the text 'eq26' inside dashed circles. Two radial lines extend from the center to the dashed circles, indicating distances: '1000' and '500'. The label '1000' is positioned near the top right, and '500' is positioned near the bottom right. The label '500' also has an arrow pointing towards the dashed circle at the bottom. The background features a repeating pattern of diamond shapes, representing the 'mdf structure under fn10'. Three callout arrows point to different parts of the diagram: one to the top edge with the text 'rounded edge see detail', one to the left edge with the text 'plywood fn02 clear fn', and one to the right edge with the text 'mdf structure under fn10'.
