PRELIMINARIES

unless otherwise noted, all materials, fixtures and fittings in the schedule are to be supplied by the builder.
co-ordinate with building owners and tenants for construction within the tenancy and provide method of works and safety plans.
comply with landlord fitout guidelines and relevant statutory regulations.
site to be fully cleaned at practical completion by professional cleaners and made suitable for occupation.
any work carried out after practical completion shall be cleaned in the same manner.
all works to be in accordance with manufacturer's instructions, local authority requirements or relevant Australian standards.
sub-standard materials or workmanship will be rejected and replaced at builder's expense. materials are to be protected on site and handed over in 'as new' condition.
items supplied by owner are to be inspected and certified by the builder as fit to use prior to use. protect all finished materials on site and during installation.
builder is to supply certification for all building works.
notices, approvals and fees regarding construction are to be allowed for by the builder. the builder is to notify the certifier for all relevant local authority inspections.
builder is to maintain a safe site to statutory standards.
builder is to provide a program with critical path, progress and completion dates for the supply of outstanding information, authority inspection, approvals and the completion and review of shop drawings. this program is to be provided prior to commencement on site and to be updated weekly.
builder is to co-ordinate all trades, including nominated subcontractors and suppliers.
The clients nominated contractors are *Platinum Electricians, Programmed (audio/visual) and Dexion (stockroom solutions)*.
where applicable, subcontractors are to provide shop drawings to the architect for review prior to fabrication. this is to be scheduled in accordance with the builder's program.
prior to commencement on site, subcontractors are to review all documents for clashes, ambiguities or omissions and provide written acceptable of conditions.
builder to provide written acceptance of site conditions following official site hand over and prior to establishment on site.
builder to provide evidence of all insurances.
allow for engineer to design and inspect shopfront and signage frames, and to supply certificate.
builder to notify engineer and certifier for inspections.
defit works as noted on plans.
within 24 hours of handover of site builder to complete, a site measure and issue to architect for review.
Allow for all builders insurances
Allow for compliance with landlord guidelines
Building approval and structural design by PS.
Allow to request inspections and coordinate certification for approval
CAT1 adjustments to all services by landlord
Allow for detailed measure including levels and ceiling feature to be issued to architect within 24hrs of site establishment
Allow for full clean prior to handover
Coordinate with PS nominated suppliers for audio,

NOTES

by perfect stranger means supplied by owner and installed by builder.
100mm is the nominal wall thickness and room sizes should be adjusted to suit existing dimensions and frame sizes.
provide manufacturer's standard and conditional warranties where applicable and include the operation and maintenance manuals.
undertake all necessary testing and commissioning prior to client operation. any equipment, apparatus, fixturing or cabling found to be effective shall be replaced.
for designated tests, including pre-delivery tests, record results and submit reports or certificates and include in operation and maintenance manuals.

BASE BUILDING WORKS

refer to landlord retail fitout guide.

METAL WORKER

all exposed ss to be fully welded, ground smooth & polished to match.
scope of works to be, hanging & merchandise rails, hanging frames, wall brackets, fitting and shopfront. subcontractor to review handover conditions and provide written acceptance to builder prior to establishment on site.
provide shop drawings to architect for review prior to fabrication.
submit samples to architect for approval prior to fabrication.
confirm all sizes prior to fabrication.
sinks to have built-in strainer (co-ordinate with plumber)
powdercoated finishes where noted.
door to stockroom to have 150mm high SS kick on both sides.
Metalwork
IT wall cap/s. Refer to tenancy plans. COS.
150x100x4 RHS head for shopfront 100x4 SHS
jambs to IT walls
30mmx15mm SS N4 rails & brackets
10mm SS N1 shelves
600mm SS N4 cove columns
SS N4 cabinetry plinths
2mm SS N4 edge trims
2mm SS N4 folded display
25mm CHS N4 rolling rack

CARPENTER

scope of works to be hang, stand + join panels, erect change rooms, install metal work, install doors, hang curtains, install SS shelving, construct dummy walls, construct stockroom wall, block off existing door in stockroom (refer to floor plan)
contractor to provide written acceptance to builder prior to establishment on site
confirm all dimensions prior to construction.
co-ordinate with cabinet maker.
Frame bulkhead at shopfront to support glazing
Door to stockroom with Borg digital lock
BL5001MG
Frame for SS shelf wall

PLUMBER AND DRAINER

scope of works to be plumbing and drainage as required to connect sink to existing services affl. subcontractor to review handover conditions and provide written acceptance to builder prior to establishment on site.
allow for construction approvals of drainage and plumbing systems and all fees associated.
align program authority inspections and approvals with builder's critical path.
Connect kitchenette to existing drainage point and coldwater
all exposed plumbing and drainage to be chrome plated.
all tapware to be chrome plated brass.
sink to be: 'lava bowl sink (rb).
sink mixers to be: 'euro sink mixer.
sinks to have built-in strainer (co-ordinate with metalworker).

GLAZIER

scope of works to be mirrors and all glazing to shopfront.
co-ordinate with metalworker and cabinet maker.
subcontractor to provide all certificates.
pack, fill and seal joints to provide neat finish.
15mm frameless glass shopfront with channel concealed in plinth and head
15mm ali framed glass doors. powdercoated frame and handles.
Polished edge mirrors as detailed

PAINTER

scope of works to be primer and 3 coats of paint finish to internal plasterboard lining
paint finish to all plasterboard surfaces to manufacturer's written specifications.
clean and paint exposed ceiling and surfaces. tbc with architect.
Paint finish to all walls and ceiling.
Matt finish through out except for stockroom door to be gloss enamel
Texture paint finish to shopfront to be Rockote Earthen Render Coarse

SIGNAGE

scope of works to be x1 illuminated 3d 'PERFECT STRANGER' sign. conceal all cables through shopfront frame. refer to detail.
x1 acrylic curtain sign fixed through curtain. refer to detail.

TILER

Scope of works to be floor, wall, joinery & door handle
Flush and level tile finish to floor, minimum grout width and grout colour to match tile
Flush and level tile finish to joinery units
provide slip rating certificates for finished floor.
subcontractors to review handover conditions and provide written acceptance to builder prior to establishment on site
all works to be strictly in accordance with manufacturer's written instructions and certified as such. comply with AS3958.1
allow to ramp entry from mall finish and allow minimum skim coat on the rest of the floor to achieve level finish.
ss trim to rug recess & lease line
polish edges where exposed on wall & joinery

CABINET MAKER

scope of works to be change room, hanging rails, counter, mirror frames, displays, accessory tables and column surround, office desks, sinks and store room shelves.
finishes to be plastic laminate.
carcasses for finishes by others including mason, metalworker & tiler
white melamine to be used for carcasses for all joinery in retail area uno.
allow to penetrate counters, desks and cabinets for cables. co-ordinate with relevant contractors.
joinery and cabinetry
Counter with Stone top & SS base
Display with tile top, SS base & timber drawers
Illuminated coved frames to mirrors for backlighting
Stockroom sink
Desk shelf units
Laminate change room walls
Mirror frame & cabinets
Hang frames & curved corners
Entry door & cupboard
Cove backings

PLATINUM ELECTRICIANS

scope of works to check existing and fit off new electrical, lighting, signage, telephone, stereo and data in accordance with documents.
subcontractor to review handover conditions and provide written acceptance to builder prior to establishment on site.
supply and install emergency lights (recessed small head) and exit signs from clevertronics starlite emergency premium range.
data line to stockroom and counter, as per RCP.
light switches to be located as per RCP.
gpos to be 300mm affl uno.
switches to be white plastic.
allow power from ceiling for shopfront signage.
allow power to cat5 cabling to counters, store front, and stereo system in stockroom, as per diagram and data.
power to POS to be through coverplate flush with flooring as indicated on plan.
wiring for stereo, subwoofer and speakers, as per diagram, coordinate with LWA on locations.
storeroom door security pad to be 1050mm affl.
electrician to review all locations prior to installation.
electrician to allow to fit with batten holders where necessary and install light fittings.
ensure all bulbs are edison screw type.
white plastic ceiling roses for lamps
note led strip lighting locations, install led and coordinate with other trades.
Electrical data and lighting
GPOs to desk, counter, retail floor, stock room and change area.
Data to desk, digital screen, people counter, WAP and counter
Stereo wire from ceiling to desk.
Camera wire from ceiling over front entry and counter to desk.
spotlights & pendants to retail ceiling, wall sconces to textured panels, recessed LED to mirror frames, wall fixtures & curtain recesses.
electrician to point all spotlights to highlight displays appropriately. co-ordinate with Lumen8

all cabinetry to be pre-wired and led strip lighting installed in the workshop prior to site delivery.

FINISHES WALL AND CEILING LININGS

scope of works to be flush and squareset plasterboards linings to wall, bulkheads, ceilings and associated stud work, battenning, framing and hanging.
New Plasterboard or MDF walls for stockroom New flushset plasterboard ceiling curved at shopfront and rear wall Coordinate landlord services for neat setout on ceiling

FLOORS

scope of works to be mf1, mf2 & mf3 to floor floors to be flush with wall level and alternate floors, ensure no trip hazards, allow to top existing floor up to 40mm.
40mm mortar bed topping to floor to achieve level floor Transition down & paint finish to stockroom floor

MASON

scope of works to be stone counter top & face. polish at visible edges

CLEANING

shopfitter to organise a clean before handover to client and before trade.

This architectural floor plan diagram illustrates a layout with specific dimensions and room details:

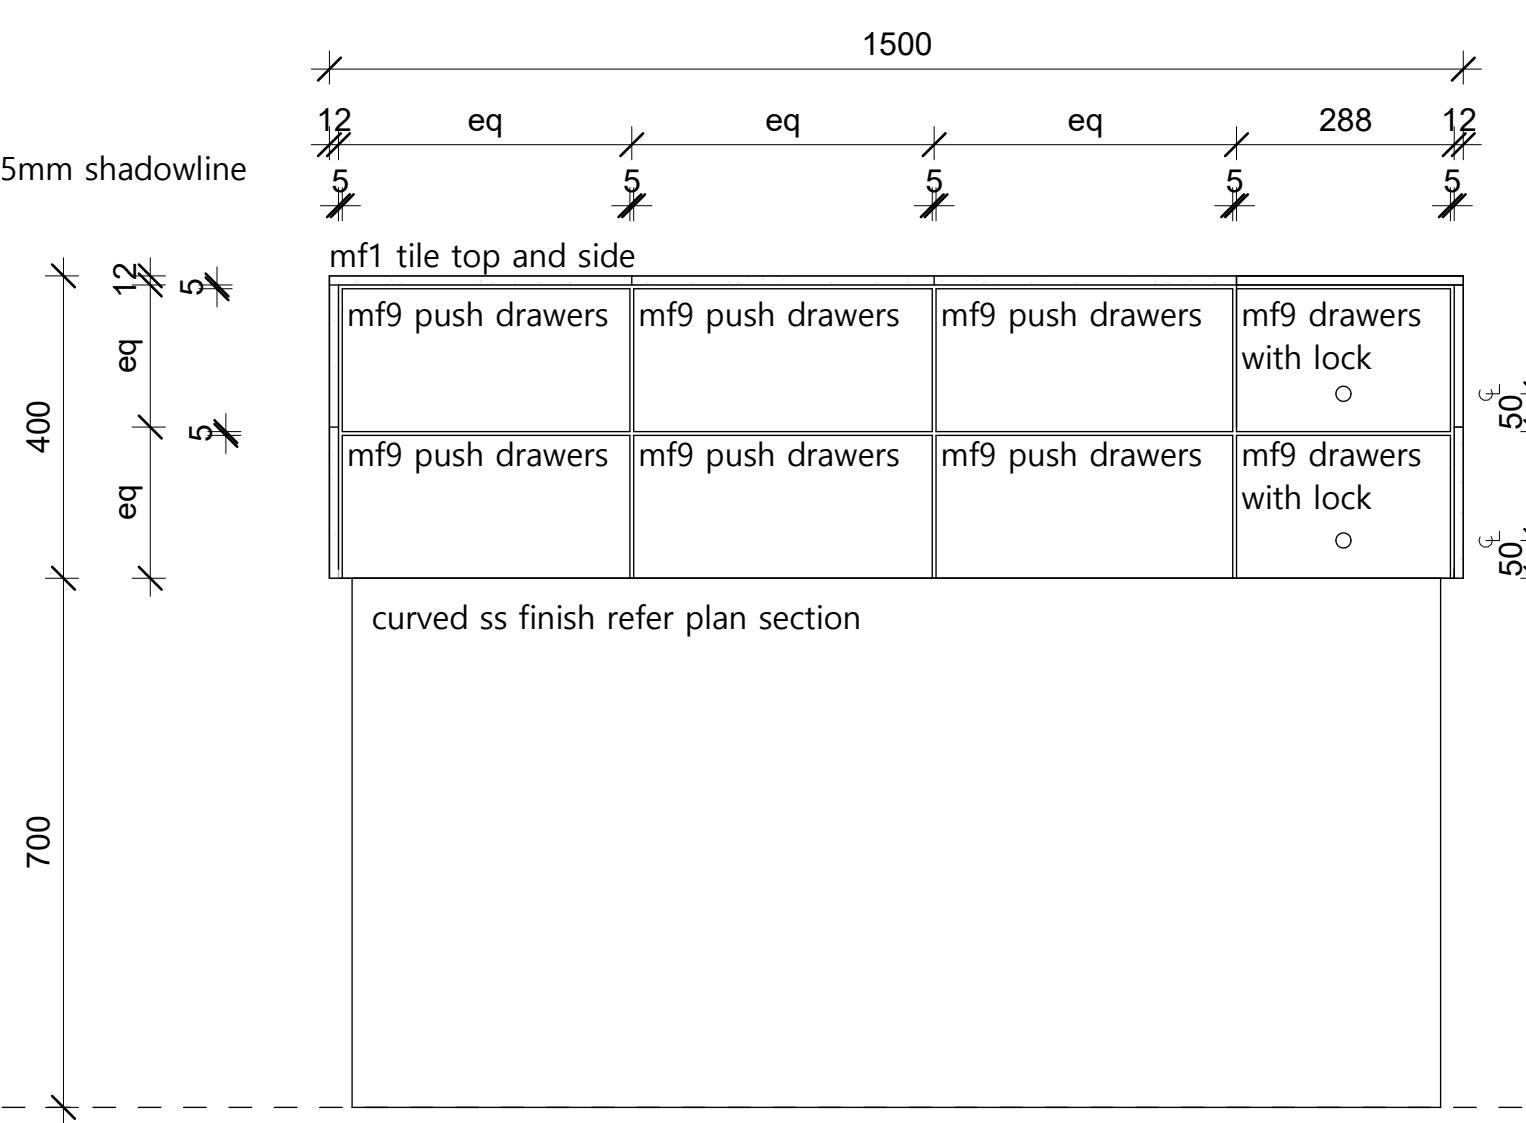

- Horizontal Dimensions:**
 - Top horizontal dimension: 1500
 - Middle horizontal dimension: 400, 400, 400, 300
 - Bottom horizontal dimension: 400
- Vertical Dimensions:**
 - Left vertical dimension: 1100, 700, ffl (Free Floating Label)
 - Right vertical dimension: 400
- Rooms and Features:**
 - Top left area: mf1 tile in 400x400
 - Top middle area: mf1 tile in 400x400
 - Top right area: mf1 tile in 400x400
 - Bottom right area: glass display
 - Bottom right area: mf1 tile in 200x300
 - A callout box contains the number 10 and 502.
 - A note at the bottom center says: "curved ss finish refer plan section".

front elevation
